1. About the beginning of 1953, East Germany was divided into three power areas (Energie-Bezirke) called North, South, and Center.

Shortly afterwards, the "VEB Energieverteilungen" were established. These "power distribution offices" were responsible for the power production by the power plants and for the distribution of this power in their respective Bezirke.

2. These VEBs have their central directorates located in the larger cities of East Germany; for example, VEB Energieverteilung Halle (Saale). They are subdivided into sub-departments; for example, special departments for heating plants (Heiswerke).

3. These VEBs are subordinate to the Ministry for Heavy Industry, specifically to the Main Administration for Electric Power. In the Department for Power Plants under this Main Administration are the following engineers: Langbein (fnu), Prutsek (fnu), and Apelt (fnu).
